MEMORANDUM FOR: Deputy Director for Management and Services
SUBJECT : Weekly Report

25X1C

2. SKYLINK Secure Voice: A clocking incompatibility problem between Headquarters and the U.S. Base Station has been resolved. Testing to overseas points will be started next week. There are still technical/operational familiarity problems to be resolved before the secure voice capability can be declared operational.

3. [REDACTED] A FLASH precedence message from [REDACTED] Saturday required one hour for Washington delivery as a result of a fire and power outage at the [REDACTED] Base Station. Other than this one delay, [REDACTED] did an excellent job of bringing up alternate bases and restoring power over the weekend.

25X1A

4. Cable Dissemination System (CDS): OC personnel met with [REDACTED] and six other representatives of the Central Reference Service on 7 May to discuss the inter-relationship between CDS and the CRS MAD and SAFE programs. After each office briefed the other on the present status of their programs, the group identified specific areas of mutual interest and agreed to arrange a meeting with representatives from OC, CRS, OJCS, and ISG to ensure continued coordination of these activities. The meeting is tentatively scheduled for 21 May.

25X1A

5. SKYLINK Terminals: Four of the SC-1 bidders declined to bid leaving [REDACTED] as the sole bidder. Their bid, received 13 May 1974, is nine percent less than the price offered in an unsolicited letter offer dated 1 March 1974. We have until 7 June to buy five SKYLINK terminals if year-end funds become available.
